Drawings

The drawings were received on May 14, 2001. These drawings are accepted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims **1-20, 27-30, and 35-36** are rejected under 35 U.S.C. 102(e) as being anticipated by Morea et al. (US 7,103,570).

Re claim **1**, Morea teaches a method for on-the-spot processing of credit applications at least one site remote from a credit headquarters, said method using human resources at said headquarters (abstract) and comprising the stages of:

(a) entering personal data of a credit applicant at a remote site (fig. 10);

(b) transmitting the entered personal data of a credit applicant at a remote site to the credit headquarters (col. 7-8; figs. 1-2);

(c) analysing said personal data at said credit headquarters and deciding the credit application while the applicant is substantially at the remote site (col. 8, lines 5-17; figs. 3-5); and

(d) thereafter transmitting the decision to the remote site and generating a computer file with the personal data and credit data, said computer file including at least one scanned image (col. 7, lines 34-59; col. 4, lines 50-57; col. 12, lines 45-53; col. 20, lines 34-40; fig. 6);

(e) storing said computer file in a computer storage means in said credit headquarters (col. 3, lines 25-39).

Re claim 2, Morea teaches entering data includes scanning at least part of an identity document of the applicant to obtain a document image and storing said image in a file of the terminal (figs. 19 and 6).

Re claim 3, Morea teaches (i) entering personal data of a credit applicant and storing the same in a computer terminal at a remote site; (ii) using a program to check whether the stored data fulfill a predetermined list of data requirements sufficient, at least, for checking the credit aptitude and eventually display a message on a terminal screen in the event data is missing; (iii) eventually repeating the preceding steps until said list of requirements is complete; (iv) generating, in response to said check being successful, a credit application message with the stored data and images and transmit the same from the terminal at said remote site to said credit headquarters; (v) checking, at said credit headquarters, the aptitude of the applicant for the credit and decide on the grant or rejection of the credit as a function of said check; (vi) transmitting a message to said terminal at the remote site with information on said decision on the credit and (vii) in case of a decision to grant, generating and printing a

contract document at the terminal for the applicant to sign (col. 1, lines 13-36; col. 14, lines 1-17; figs. 3-5).

Re claim **4**, Morea teaches entering data includes entering in the identification of the applicant and scanning at least part of an identity document of the applicant to obtain a document image and storing said image in a file of the terminal association with said identification data (col. 7, lines 34-59; col. 4, lines 50-57; col. 12, lines 45-53; col. 20, lines 34-40)

Re claim **5**, Morea teaches displaying a multiple-choice menu of applicant activity profiles selecting an applicant profile from said multiple-choice menu, and said step and includes using said selected profile for selecting and displaying a checklist from a plurality of predetermined checklists of documents required for imaging (col. 4, lines 50-57; col. 8, line 64 to col. 9, line 7; col. 15, line 45 to col. 17, line 24).

Re claim **6**, Morea teaches multiple-choice profile menu includes employee, self-employed, retired or bank-cardholder (col. 15, line 45 to col. 17, line 24; fig. 9)

Re claims **7-10**, Morea teaches in response to detecting an incomplete selected checklist, thereby only enabling proceeding to said step (iv) of generating said credit application message in response to a complete selected checklist (figs. 17 and 19)

Re claim **27**, Morea teaches analysis comprises checking whether the customer has not been reported as defaulted in debt repayment by other entities and credit amounts with others entities and the said decision includes setting a limit to the credit to be granted as a function of the existence of said credit amounts (fig. 5).

Re claim **28**, Morea teaches transmissions between the credit headquarters and the remote site are channeled via internet (figs. 1-3).

Re claim **29**, Morea teaches providing a website at said credit headquarters and wherein said transmissions from the remote site are channeled to said website (col. 3, lines 1-24; col. 14, lines 55-62; col. 15, lines 15-57).

Re claims **11-20, 30, and 35-36**, Morea teaches a method as claimed in claims 1-10 and 27-29. Therefore the rationale applied in the rejection of claims 1-10 and 27-29 applies herein.
